Learning goal 1.4	Students can determine if lines are parallel, perpendicular or neither on the coordinate plane

Student skills:
- ❏ I can rearrange equations to y=mx + b form.
- ❏ I can recognise and explain a line's slope and y-intercept from an equation.
- ❏ I can write an equation for a given line.
- ❏ I can define key terms such as parallel and perpendicular and recognize these properties

Extra skills
- ❏ I test to see if a point is on a given line using an equation.
